NC-MQR01W

- ❖ SANYO's NC-MQR01 multi-charger for Ni-MH and Ni-Cd batteries features the latest technology in a slim, ultra-compact body.
- ❖ While compact in design, it can charge up to four "AA" batteries or two "AAA" batteries or a combination of both at the same time. Perfect for digital cameras and other equipment that use rechargeable batteries.
- ❖ The Auto Voltage Selection capability (AC100-240V) allows for easy charging when abroad. An essential item for executives as well as travellers going overseas.
- ❖ Advanced control functions offer multiple overcharge protection that extends battery life and guarantees performance to the fullest.

1. Peak Cut Control

This innovative technology protects batteries against overcharging by detecting exactly when the battery has reached full charge.

2. Timer Control

A timer control function is available as a protective feature.

3. Temperature Control

Built-in sensors monitor battery temperature to further prevent overcharging.

4. Individual Charging Control

This function monitors the voltage of batteries with different capacities to make sure each one is charged properly.

- ❖ A protective mechanism that automatically stops charging if a non-rechargeable battery is accidentally inserted.
- ❖ Built-in charging indicator.

NC-MQN01W

- ❖ Compact and lightweight.
- ❖ Cost-effective charger with 8 hour timer.
- ❖ As a safety measure, the charge current automatically lowers if a non-rechargeable battery is inserted.

NC-SVC01EX-S (120V)

NC-LC01EX-S (220-240V)

- ❖ Four "AA" batteries included in each package.
- ❖ Rapid charging with four control functions.
- ❖ Automatic charging stop if a non-rechargeable battery is inserted.
- ❖ Built-in charging indicator.
