MG SmartLink MX

MGSLM48001

Description

Use the SmartLink MX for battery systems with two or more MG Masters HV or LV. The SmartLink MX collects and combines all data from the MG masters in a battery system. It transmits the combined data over CAN-Bus and makes it available for third party devices. It also makes combined battery data available in such a way, that parallel connected systems are shown as one battery bank. The SmartLink MX is able to communicate with both the Master LV for low voltage systems and the Master HV for high voltage systems.
