EMPOWERING SUSTAINABILITY

## The switchgear is on us

For a limited time, when you purchase a Noark Hybrid Inverter, we'll supply

**Noark Switchgear - FREE OF CHARGE!**

That's up to \$950 worth of gear FREE\*!

Noark's single and three phase hybrid inverter range has been built on a proven platform and enhanced with user integration refinements to offer solutions for a diverse number of application sizes & power requirements.

These multifunctional Hybrid inverters combine all the functions of an inverter, dual MPPT solar charge controller and multi-chemistry battery charger, which can all be monitored and controlled with the myNOARK software monitoring package.

System configuration and monitoring is super efficient by utilising either the much more user-friendly inverter mounted GUI, or via the fantastic myNoark portal - with all data stored on Australian servers.

CEC approved, 10-year warranty, and backed by an Australian based support team, the Noark Hybrid Inverter range is now even more attractive with our **free switchgear promotion** (\*\$450 on 1P models and \$950 on 3P models at current retail prices). See over for details.
