

Turtle Charger (200W) - Suits all Rechargeable Chemistries

Customisable Pre-programmed Battery Charger

DESCRIPTION

The TSB004 Series offer a wide range of single output DC chargers up to 200 watts.

The Digital Universal Charger is suitable for all rechargeable battery chemistries. It is custom programmed by our engineers to fit specific design requirements.

Pre-programming includes functions setting charging current and charging voltage, constant current, constant voltage, pre-conditioning, float charging, charge termination methods and setting. Input and output cabling and connector options for all international markets are available upon request.

Modules available as PCB stand-alone or plastic enclosure. See options below.
