### **Product Description:**

The ANSMANN POWERLINE 4 LIGHT is designed for charging AA and AAA NiMH or NiCd rechargeable batteries. This desktop charger is able to simultaneously charge 1-4 AA or AAA rechargeable batteries with individual supervision of each cell. The charging current is 450mA for AA and AAA cells.

The LCD display shows battery voltage and charging status as a percentage.

The charger offers multiple over charging protection per battery, auto cut-off function, trickle charging, reverse polarity protection and faulty cell detection.

In addition, the POWERLINE 4 LIGHT has a 5V 1000mA USB socket for charging a variety of devices such as smart phones. The USB socket cannot be used at the same time as charging AA / AAA cells. Also included is a 100-240V AC power supply with UK and EU interchangeable plugs.

ANSMANN offer a 3 year warranty with this product.
