USB Charge & Sync Cables

Not All Charge Cables Are Created Equal

When you've got things to do, ensure there's nothing to slow you down by using the best charging cables available.

Enecharger's Charge & Sync cables feature the highest specifications available for the most popular USB standards: USB-A, USB-C™, Micro USB and Lightning™.

All cables are suitable for both charging and data syncing between devices. Each cable features the fastest charging rate capability from 2.4A; up to 3.0A for USB-C™ cables.

Plus, some cables are rated USB3.1 Gen2 to provide up to 10Gbps data transfer speed - **that's 20x faster than USB2.0!**

With durable long strain connector relief and a braided design, premium Charge & Sync cables this tough are the only cables you're going to need.

Fast Charging

Designed for the fastest available charge speeds - with Power Delivery (PD) in select models. Get your mobile device powered up in no time.

Fast Data Syncing

Chipped to provide fast data syncing capabilities, including USB3.1 Gen2 in select models.

Long Strain Relief

Protected and flexible cable and terminal connection to significantly reduce wear and tear at this typically vulnerable point.

Braided Design

Extra durable and tangle free cables designed to withstand fraying and constant tugging. Available in 1 metre or 2 metre lengths.
