

## Ni-MH Low Self Discharge Rechargeable Batteries

Can be use more and more and more  
Low Self Discharge Ni-MH Rechargeable Batteries

**Made in Japan**

Ni-MH Rechargeable Batteries "Fujitsu Rechargeable"

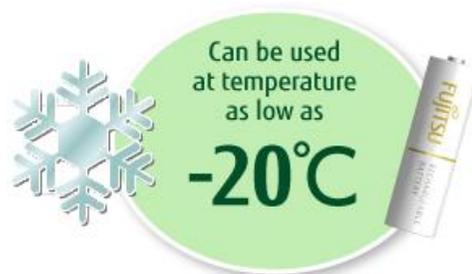

"Fujitsu Rechargeable" and "Fujitsu High Capacity Rechargeable" are Low Self Discharge rechargeable Ni-MH batteries.

### Charge the Battery Anytime

Fujitsu Rechargeable batteries don't have memory effect. They can be recharged anytime.

### Suitable for low temperature

Fujitsu Rechargeable batteries can be used at temperature as low as -20 degrees Celsius.

### Environment Friendly Charged by solar energy

Fujitsu Rechargeable ready to use straight from the pack and are pre-charged by solar energy at the factory ready for delivery.

### Made in Japan

"Fujitsu Rechargeable" is made in Japan by FDK Twicell Co, Ltd – The sole maker in Japan of LSD NiMH batteries. We promise High Quality by our consistent production.

## Fujitsu Rechargeable

Available in AA (B2 and B4) Min.1900mAh (Typ.2000mAh) and AAA (B2 and B4) Min.750mAh (Typ.800mAh)

**Economical and Environmental Friendly**

"Fujitsu Rechargeable" can be used 1800times.\*

\*Cycle time is based on IEC 61951-2 2011(7.5.1.1)

"Fujitsu Rechargeable" helps you to save money.

**You can use right after purchased. You can use after 5 years.**

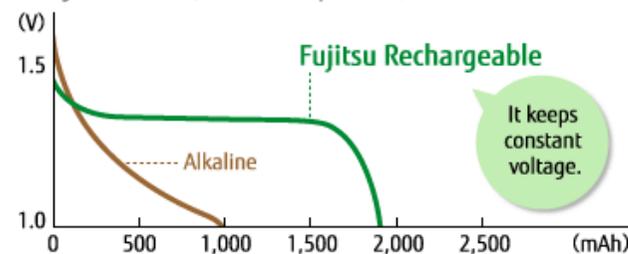

"Fujitsu Rechargeable" is a low self-discharge Ni-MH battery.

It can be use after 5 years storage.

**Constant voltage from start to end**

Difference of voltage change:  
Discharge at 500mA (in room temperature)

"Fujitsu Rechargeable" keeps constant voltage from start to end. Higher than alkaline in most devices!

**High power for High drain devices**

Digital Camera

Photo Flash

"Fujitsu Rechargeable" is great for high drain devices.

## Fujitsu High Capacity Rechargeable

Available in AA (B2 and B4) Min.2450mAh (Typ.2550mAh) and AAA (B2 and B4) Min.900mAh (Typ.950mAh)

### High Capacity 20% More Power

"Fujitsu High Capacity Rechargeable" offer about 20% more power than "Fujitsu Rechargeable".

### Economical and Environmental Friendly

"Fujitsu High Capacity Rechargeable" can be used 500 times.\*

\*Cycle time is based on IEC 61951-2 2011(7.5.1.1)

"Fujitsu High Capacity Rechargeable" provide long lasting power and save money.

### High power for High drain devices

Digital Camera

Photo Flash

"Fujitsu High Capacity Rechargeable" supply high performance for high drain devices.

# Fujitsu Portable Smart Charger

"Fujitsu Portable Smart Charger" is easy to use and lightweight providing 2 key features

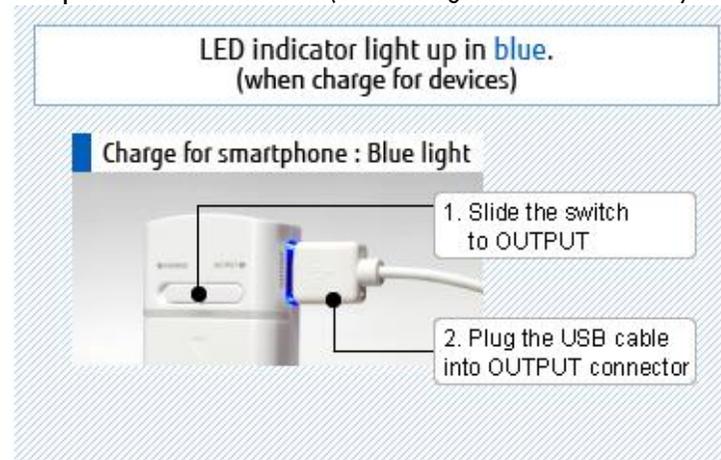

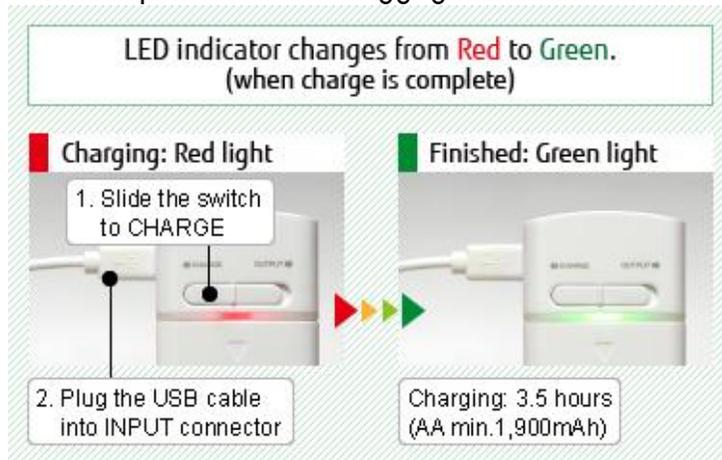

Fast, Automatic Battery Charger that Doubles as a Power Bank

Use to Charge Smartphones and other USB powered portable devices

Two models – Standard & High Capacity.  
Safe and approved for air transport in checked baggage unlike Lithium Ion

If the rechargeable batteries are flat you can insert alkaline batteries to use the power bank function (2 cell charger shown not currently available in all markets).

- Reverse Insertion Protection
- Short Circuit Protection
- Primary Battery Charging Protection
- Overuse Protection with Timer
- High Temperature Detection Sensor
