

Energy XC3000

Battery management system with charging and quick testing capabilities.

Multifunctional charger for :

- 1 - 8 AAA / AA size NiMH batteries
- 1 - 4 C / D size NiMH batteries
- 1 - 2 9V size NiMH batteries
- 1 x Lilon/LiPo 3.6V/3.7V or 7.2V/7.4V battery pack (via adaptor plate).

Microprocessor controlled charging through each independent charging slot with LCD display.

Reliably and quickly tests all common battery types and sizes.

Energy 8 Plus

Charger and maintainer for NiMH / NiCd batteries of all sizes.

Microprocessor controlled charging of:

- 1 - 6 AAA / AA size rechargeable batteries
- 1 - 4 C / D size rechargeable batteries
- 1 - 2 9V size rechargeable batteries

Individual charging slots are monitored and battery status is displayed via LED indicators.

Features trickle charge, automatic alkaline battery detection, overcharge protection and reverse polarity protection.

Powerline 4 Pro

Charger / discharger and powerbank in one. Suitable for use at home and on the go.

Powered by AC input with four international plug styles included for worldwide usage, or by 12VDC input for in-vehicle charging of:

- 1 - 4 AAA / AA size NiMH / NiCd batteries

Individual charging slots are easily monitored with illuminated LCD display.

Features 5V 1A max. USB output to charge mobile devices.

Selectable charging programs and multiple overcharge protections including auto cutoff function.

Powerline 8

Charger / discharger and powerbank in one.

Powered by AC input for charging of:

- 1 - 8 AAA / AA size NiMH / NiCd batteries

Individual charging slots with multi-coloured LED indicators showing battery status.

Features 5V 1A max. USB output to charge mobile devices. Also has overcharge protection, auto cutoff function, faulty cell detection, alkaline battery detection and reverse polarity protection.
