innovation in energy storage

victron energy
BLUE POWER

- 12V to 900V system solutions
- Safer by design
- Compatible with NMEA2000 protocol
- Scalable system designs to provide maximum capacity
- The preferred battery brand of boat builders worldwide
- Compatible with major / OEM electric motor manufacturers

- From single components to full power distribution systems, solar panels to lithium batteries and everything in between
- Building block design allows for easy system adaptation or upgrades
- Remote monitoring & control worldwide including advanced communications options that plug into your existing system
- Compatible with Glass Bridge (MFD) brands such as Raymarine, Garmin, Lowrance & more

Global brands **MG Energy** and **Victron Energy** specialise in the development and engineering of battery and power distribution solutions. Both **MG** and **Victron** products can be integrated into the same system and work seamlessly together to provide smarter and sustainable power solutions for marine applications.
