

PRESS RELEASE

Victron Energy is putting the power to maintain your pride and joy in the palm of your hand

Milperra, NSW (March 2022)

The brand new Blue Smart IP65 charger from Victron energy is a super versatile, fully automatic charger and maintainer for batteries commonly found in power sport applications such as motorcycles, personal watercraft and even lawnmowers.

Set on the platform of the hugely popular Blue Smart IP65 charger range, the new compact Power Sports charger is fully controlled from your smart device via Bluetooth. With 1.1A output and suitable for 6V and 12V lead acid and lithium batteries, the Power Sports charger features advanced charging algorithms, fully automatic and in-built diagnostics plus multiple safety protocols. The Blue Smart IP65 Power Sports charger manages your battery to ultimately extend its service life. It really is **Smart**.

Real time monitoring and control via your Bluetooth enabled smart device provides instant feedback of battery status, provides charge profile options and charge history and even has a dead-battery recovery and power supply mode.

Winter is coming, and many of our pride & joys will be parked away awaiting warmer days. Simply plug and play to let Victron Energy's Blue Smart IP65 charger maintain your passion.

With a RRP of \$117.95 and 5-years warranty, the Blue Smart IP65 charger is the insurance you need to ensure you're ready to ride at any time.

Available from all leading motorcycle & accessories retailers and specialist battery stores.

Who

Master Instruments is a 3rd generation run Australian battery engineering company entering its 80th year of operation. As battery specialists, Master Instruments has built a strong reputation for delivering high performing battery and charger solutions to the Australian market. As a Victron Energy premium dealer and accredited self-repair agent, we are proud to stand behind the Victron Energy brand of battery chargers and power conversion equipment.
